Quotes

It's the little things that make Freedom become Not Freedom.

—Theo De Raadt

Hardware donations do not come from vendors who use OpenSSH on parts of their stuff. They come from individuals. The hardware vendors who use OpenSSH on all of their products have given us a total of one laptop since we developed OpenSSH five years ago. And asking them for that laptop took a year. That was IBM.

—Theo De Raadt

So the HP guy comes up to me (at the Melbourne conference) and he says, 'If you say nasty things like that to vendors you're not going to get anything'. I said 'no, in eight years of saying nothing, we've got nothing, and I'm going to start saying nasty things, in the hope that some of these vendors will start giving me money so I'll shut up'.

—Theo De Raadt

What this power is I cannot say; all I know is that it exists and it becomes available only when a man is in that state of mind in which he knows exactly what he wants and is fully determined not to quit until he finds it.

—Alexander Graham Bell

Briefly stated, the Gell-Mann Amnesia effect is as follows. You open the newspaper to an article on some subject you know well. In Murray's case, physics. In mine, show business. You read the article and see the journalist has absolutely no understanding of either the facts or the issues. Often, the article is so wrong it actually presents the story backward—reversing cause and effect. I call these the "wet streets cause rain" stories. Paper's full of them.

In any case, you read with exasperation or amusement the multiple errors in a story, and then turn the page to national or international affairs, and read as if the rest of the newspaper was somehow more accurate about Palestine than the baloney you just read. You turn the page, and forget what you know.

—Michael Crichton (1942-2008)

A reliable predictor of future insuccess: if someone writes long (and frequent) emails.

—Nasim Taleb

The beauty of doing nothing is that you can do it perfectly. Only when you do something is it almost impossible to do it without mistakes. Therefore people who are contributing nothing to society, except their constant criticisms, can feel both intellectually and morally superior.

—Thomas Sowell

Whenever you hear the consensus of scientists agrees on something or other, reach for your wallet, because you're being had.

—Michael Crichton

Science is the belief in the ignorance of the experts.

—Richard Feynman

Power concedes nothing without a demand...

—Frederick Douglass

Historically, the claim of consensus has been the first refuge of scoundrels; it is a way to avoid debate by claiming that the matter is already settled.

—Michael Crichton

If you thought that science was certain—well, that is just an error on your part.

—Richard Feynman

x86 virtualization is about basically placing another nearly full kernel, full of new bugs, on top of a nasty x86 architecture which barely has correct page protection. Then running your operating system on the other side of this brand new pile of shit. You are absolutely deluded, if not stupid, if you think that a worldwide collection of software engineers who can't write operating systems or applications without security holes, can then turn around and suddenly write virtualization layers without security holes.

—Theo de Raadt

”A cynical, mercenary, demagogic, corrupt press will produce in time a people as base as itself.”

—Joseph Pulitzer

”You are a fine debater, sir. It is a shame you have used your verbal gifts for mere hucksterism and the advancement of your own greed.”

—Data, from the Star Trek TV show

Recipes

Salad Dressing

This is Mary Eades' recipe except I have learned to use a mason jar and a hand immersion blender. The original steps are also given below.

This tastes something like Miracle Whip, which is what I grew up on. I don't think I'd ever had regular Mayo until I was an adult. Anyway, if you want it to taste more like real Mayonnaise, *don't* add the sweetener.

The mason jar needs to be just slightly bigger than the blender head. This is because the blades need to start out in the water solution instead of the oil. The mason jars and blender shown below should work.

Ingredients

- 1.5 cups Bertolli light olive oil
- 2 raw egg yolks (might want to pasteurize them unless you're certain they're okay)
- 2 table spoons lemon juice
- 4 tea spoons white wine vinegar or champagne vinegar
- 1/2 teaspoon salt
- 1/2 teaspoon dry mustard
- 2 dashes of cayenne pepper
- 2 packets of lakanto sweetener (or splenda, stevia, sugar, whatever)

Kitchen equipment

- [One pint mason jar](#) (needs to be this particular size)
- [Hand immersion blender](#)
- [Egg yolk separator](#)
- Measuring cups and spoons
- [Blender \(for original recipe steps\)](#)

Steps

1. Add all ingredients except oil into mason jar
2. Add oil and allow to separate (usually takse 15-30 seconds)
3. Place blender stick into jar at very bottom
4. Activate blender at high speed
 - Do not pulse
 - Do not move blender head around
5. As mayonnaise forms, slowly tilt and lift the head of the immersion blender until all oil is emulsified.

Original Recipe Steps

1. Add all ingredients except oil into blender
2. Turn the blender on low
3. Slowly pour the oil in a small steady stream until finished
 - A funnel may help prevent making a mess

Sources

Yogurt

This recipe is a way to make yogurt from bacteria tablets and half and half (or milk).

Ingredients

- 10 [bacteria tablets](#)
- 1/4 gallon of half and half
- Two table spoons of [Potato starch](#)

Kitchen equipment

- [Yogurt maker with 2L container](#)
- [Blender](#)
- Measuring cups and spoons

Steps

1. Clean everything with 1-step no-rinse cleanser
2. Pasteurize the dairy at 180 for ten minutes
3. Cool the dairy to less than 110
4. Place 10 bacteria tablets and 2 table spoons of potato starch into blender
5. Pour some of the dairy into blender, enough to not splash through the top
6. Turn on blender to low, then high briefly, to break up the tablets, then back to low
7. While running on low, add remaining dairy
8. Turn off blender, pour mixture into 2L Luvele yogurt container, put on the lid
9. Put 2L container into Luvele yogurt maker, add external water to line
10. Set yogurt maker to 20 hours at 104 F
11. After 20 hours put 2L container into fridge

Beef steak in oven

Ingredients

- Beef steak, one pound or less (NY strip or ribeye)
- Salt, pepper
- Garlic (optional)
- Olive oil (optional)

Kitchen equipment

- Aluminum cooking pan
- Tongs
- Oven mits

Steps

1. Put steak into cooking pan
2. Allow steak to come to room temperature (30 minutes)
3. Preheat oven to 500 degrees F
4. Salt and pepper steak to taste
5. Add optional garlic and olive oil
6. Put pan into oven for 5 minutes
7. Flip steak in pan and put back for another 5 minutes
8. Leaving oven door closed, turn off oven and wait up to 5 minutes
Depending on size, it may be ready without any waiting

Beef steak on gas grill

Ingredients

- Beef steak
- Salt

Kitchen equipment

- [Grill brush](#)
- Gas grill
- Tongs

Steps

1. Salt the meat on both sides
2. Turn the gas grill on high and clean it off
3. Wait 3 minutes for it to heat up
4. On high, cook the steak for 2 minutes on each side
5. Turn the grill to lowest setting
6. Cook the steak for 1 minute on each side

Coffee!

Ingredients

- Whole bean coffee
- Filtered water
- Heavy cream

Kitchen equipment

- Water kettle
- Food thermometer
- Aeropress
- Coffee grinder

Steps

1. Put 3 cups of filtered water in the kettle
Heat to 170 if drinking without cream
Heat to 180 if drinking with cream
2. Grind about 75% of the Aeropress measuring scoop worth of whole beans
3. Place ground beans into upside down aeropress
4. Pour the water into the Aeropress and wait 30-60 seconds
5. Flip over a cup and press out coffee
6. Add cream

Star bucks quiche egg bites

When I did these, I did not put any oil into the mason jars. Supposedly if you spray some oil the egg bites will fall out, but I just used a spoon to eat them at the end. The bacon didn't tear very well with a spoon so next time I might use a fork.

Ingredients

- Six eggs
- Pre-cooked bacon
- Cream cheese
- Salt

Kitchen equipment

- Very small wide mouth mason jars
- Sous vide machine of some kind
- Two identical bowls
- A kitchen scale
- Immersion blender
- Waterproof oven mitts

Steps

1. Let the cream cheese come to room temp (or maybe microwave?)
I can't remember what I did
2. Break 6 eggs into one of the bowls
3. Set your scale to zero using the other identical empty bowl
4. Place bowl with eggs on scale to get the total grams of the eggs alone
5. Place equal grams of cream cheese into same bowl with eggs
E.g. if you had 300 grams of eggs, add 300 grams of cream cheese
6. Add 6 grams of salt (one gram per egg)
7. Blend everything in that bowl together with the blender
8. Tear apart and put chunks of precooked bacon into the tiny mason jars
9. Pour egg/cheese mixture into mason jars
10. Put lids on very tight so they don't leak any water into them
11. Cook these in the Sous Vide at 185F for 25 minutes

About

In high school a kid named Curtis would come by my house at 5AM and he would “tap, tap, tap” on my window. We would go running around the neighborhood to practice for cross country. After school it was the same thing, except we would take his dog Sally sometimes.

We used to go running around the neighborhood sometimes. We went to the golf course too and the golfers would yell at us if we got in the grass, so we stopped doing that after a few times. Curtis tried to keep me out of trouble at the golf course but I was a dumb kid.

Curtis would even run in circles waiting on me because I was too slow. But I don't remember a time when he stopped taking me running. I was probably the one who stopped going, but I can't remember.
